SIGCO's CMS B7 Is Operational!

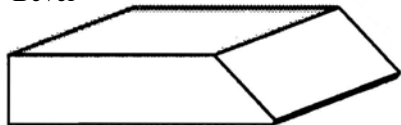

Flat Polish

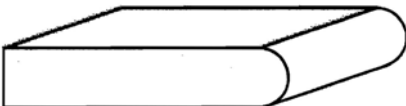

Pencil Polish

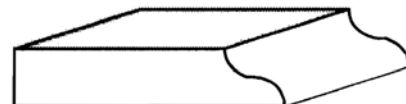

Bevel

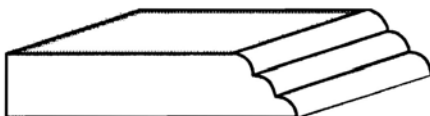

Miter

Bullnose

Ogee

Triple Water Fall

V-Groove

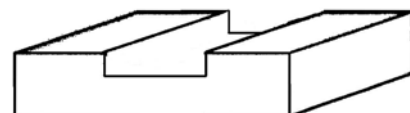

Plate Groove

SIGCO is now taking orders for product utilizing our new CMS B7 CNC fabrication machine.

In addition to providing redundancy to our Forvet shower door machine, the B7 provides CNC fabrication on larger lites and new edge profile capabilities as well as new product offerings such as plate grooving, V-grooving and scripting.

Line drawings of these profiles are shown on the left. A line card detailing more information on profiles by glass thickness, minimum glass sizes, maximum glass sizes and other capabilities is available from your sales person or by contacting customer service.

In addition to the new B7, SIGCO is pleased to announce that we are now carrying 3/4" monolithic float glass in clear. Please call us for all of your heavy glass fabrication needs!
